Maybe even better than free.

No account or credit card is required to get started. Just upload the file you want to share with your friends and we send you a download link to your file. Any file in any format can be uploaded and downloaded for free. There are no restrictions on the number of times a file can be downloaded. You decide who you want to share your files with. Unfortunately, we can’t make that part free. It is also allowed to link to the download page from websites and communities. Our service is completely free for everyone. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. Using file, you can circumvent those limits without paying to upgrade your team chat service. You can give this download link to your friends by mail or instant messenger. You don't needany special software installed to be able to download your files. You can upload any type of file (movies, music, documents, images, zip files and more). Filescan be downloaded from any computer from our high speed servers. filehosting provides an easy possibility for you to send large files to your friends. We haveno file size limit. If only we could, we surely would! On the other hand, using file can actually save you money. File is free to use with no gotchas and nohidden fees. Simply upload your file and share the link. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing youmoney in data storage fees. So try our free and simple filehosting service now. Why pay storage fees for a file that you just wanted to send to a friend orcolleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. Keep your files private, or send your downloadlinks only to friends or family. Alternatively you can choose to share your download links on blogs, forums and social networking sites. The cost of that datatransfer is covered by your internet service or the data plan on your phone. Your wallet will be none-the-lighter! Just so we’re all 100% clear here: When youshare a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. When you use file, youavoid storing the file you’re sending in your cloud storage or mail server.
