cambridge audio 340t manual

For continued compliance only Cambridge Audio accessories should be used with this product and servicing must be referred to qualified service personnel. We advise you follow all instructions, heed all warnings and keep the instructions for future reference. The Control Bus carries control information, in the form of demodulated remote control signals, between the tuner and other Cambridge Audio devices connected to it. When in Standby the front panel display shows the current time in hours and minutes, as well as the date if RDS clock mode is enabled. The 340T can store up to 20 Presets for each of the FM and AM bands. The Shift button alternates the 5 buttons between accessing Presets 15 and 610. It will also generate a command on the control bus that, when connected, will turn on a Cambridge Audio azur series amplifier. If it is desired to control a Cambridge Audio azur amplifier by the 340T's Alarm or Sleep timers, connect the two units via the orange Control Bus. Switches the 340T between On and Standby mode. The blue LED on the front panel of the 340T indicates that it is On when bright and in Standby mode when dim. These allow access to any stored presets you might have saved in the 340T. Ensure the plug is fully inserted into the wall socket and is switched on. Check fuse in the mains plug or adaptor. Ensure that the amplifier is set correctly. Check that the interconnects are inserted correctly. Check aerial connections and placements. You will need to ship this product in either its original packaging or packaging affording an equal degree of protection. User's manual Page 3 SAFETY PRECAUTIONS.
